CAMELLIA PRAMANICK

DATA ANALYST | BUSINESS INTELLIGENCE ANALYST | POWER BI

Detroit, MI | pramanikcamellia@gmail.com

LinkedIn | camelliapramanik.github.io

PROFESSIONAL SUMMARY

Data Analyst and Business Intelligence professional with an M.S. in Applied Data Analytics and experience in sales, customer, profitability, and operations analytics. Skilled in SQL, Power BI, Python, and relational data modeling, with a focus on reliable reporting and business decision support. Combined enterprise analytics experience with first-author economic research and projects in customer intelligence, predictive modeling, and database design.

TECHNICAL SKILLS

Business Intelligence: Power BI, DAX, Power Query, Tableau, Microsoft Excel; KPI reporting and dashboards.

Programming & Statistics: SQL, Python, Pandas, NumPy, Scikit-learn, Matplotlib, R, Stata; statistical and regression analysis, time-series analysis, predictive modeling, and machine learning.

Data Platforms & Modeling: SQL Server, MySQL, MySQL Workbench, IBM i, ODBC, Microsoft Fabric, Microsoft Azure; relational and dimensional modeling, star schemas, ETL, data transformation, and data validation.

Business Analysis: Exploratory data analysis, customer and operations analytics, sales and profitability analysis, dashboard requirements, stakeholder reporting, and data visualization.

Foundational Knowledge (Workshops): Snowflake and data lake concepts.

PUBLICATION & RESEARCH

The Economic Impact of Tariffs on U.S. Businesses: Prices, Trade, and Investment

First Author | *Journal of Applied Business and Economics*, Vol. 28, No. 4 | 2026

- Applied **statistical analysis, regression, and time-series economic modeling** to examine how tariffs related to U.S. prices, trade, business uncertainty, and private investment.
- Used public economic data to assess **short- and long-term relationships** and model how changes in economic conditions affected business indicators.

Publication: doi.org/10.33423/r1ja5842

RELEVANT EXPERIENCE

Caramagno Foods Co. **Detroit, MI**

Data Analyst *Jan 2026 - Oct 2026*

- Gave leadership a consolidated view of **sales, profitability, and operational performance** through Power BI dashboards and enterprise data models built with **SQL, Power Query, and DAX**.
- Made outstanding balances and customer inactivity easier to monitor through **accounts receivable aging** and **30-day ordering activity** dashboards, supporting collections and customer follow-up.
- Helped leadership investigate product and pricing changes using **15-day and 30-day rolling, MTD, YTD, and YoY KPIs**, highlighting underperforming periods and products.
- Improved the reliability of workforce and operational reporting by identifying data discrepancies, validating calculations, and collaborating with IT and operations to resolve reporting issues.

Data Analyst Intern *May 2025 - Dec 2025*

- Made CRM and operational information easier to track through **10+ dashboards and visual reports** and **20+ Microsoft Forms** for data collection and stakeholder reporting.
- Supported routing and delivery reviews with validated data and analysis of operational trends and potential inefficiencies; worked with IT to refine dashboard requirements and reporting workflows.

RELEVANT EXPERIENCE (CONTINUED)

Universal Stream Solution, Inc. **Remote**

Jr. Business Analyst *Mar 2023 - Dec 2023*

- Improved sales reporting accuracy and consistency by **18%** through automated workflows and KPI reporting.
- Translated product, sales, and customer analysis into recommendations for business stakeholders, using **Python, Power BI, and Excel** to explain performance trends and inform planning.

First Advantage Pvt. Ltd. **Mumbai, India**

Operations Analyst *Jul 2021 - Jan 2022*

- Supported reliable reporting for **Infosys** by validating records and preparing reports for compliance reviews.
- Turned operational data and feedback into recommendations to address quality issues and improve workflows.

ANALYTICS PROJECTS

Sales & Customer Intelligence | SQL Server, Power Query, DAX, Power BI

- Modeled **121,317 sales-detail rows across 31,465 orders** from **AdventureWorks sample data** in SQL Server and Power BI using a star schema with **1 fact table and 5 dimensions**.
- Created **55 DAX measures** and **4 interactive report pages** covering sales, estimated profitability, customer activity, product performance, and territories.

Predictive Customer Churn Modeling | RapidMiner, Machine Learning

- Completed a machine-learning coursework project using a **Kaggle dataset**, applying data preparation, feature analysis, and model evaluation to explore customer churn.

Food Redistribution Management Database | MySQL, MySQL Workbench, Lucidchart

- Collaborated on a **12-week team project** to design and implement a database for reallocating surplus food from restaurants to shelters and nonprofits.
- Contributed to relational database design and tested data integrity, search filters, permissions, and tracking features to support reliable donation records and reporting.

Additional BI Coursework | Power BI, SQL, Excel, Tableau

- **Product & Customer Sales Analysis:** Imported JSON data, cleaned records in Power Query, and built dashboards for annual sales, country performance, and customer rankings.
- **Financial Country Analysis:** Created and validated SQL tables, analyzed data in Excel, and developed Power BI dashboards for annual sales and top- and bottom-performing countries.

EDUCATION

University of Detroit Mercy **Detroit, MI**

M.S. in Applied Data Analytics | GPA: 3.8/4.0 *2025*

Deen Dayal Upadhyaya Gorakhpur University **India**

B.Com. in Economics, Minor in Business Administration | GPA: 3.5/4.0 *2018*

CERTIFICATIONS

Business Analyst Certification | Testbook | Jan 2023

Social/Behavioral Researchers | CITI Program | Issued Apr 2024; expires Apr 2029

ADDITIONAL EXPERIENCE

Senior Customer Service Executive | Concentrix Daksh Services India Pvt. Ltd.
Feb 2022 - Apr 2022

Business Development Executive / Business Analyst Support | Universal Stream Solution, Inc.
Apr 2019 - Jun 2021
