CAMELLIA PRAMANICK

Data Analyst | Business Intelligence Analyst | Power BI

Detroit, MI | pramanikcamellia@gmail.com
linkedin.com/in/camelliapramanick

PROFESSIONAL SUMMARY

Data Analyst specializing in business intelligence, operational analytics, and decision support using Power BI, SQL, DAX, Power Query, Python, and enterprise data systems. Experienced in developing dashboards and data models across sales, customer, profitability, workforce, and operational analytics. M.S. in Applied Data Analytics with first-author published research in applied economics and time-series analysis.

TECHNICAL SKILLS

- **Business Intelligence:** Power BI, DAX, Power Query, Tableau, Microsoft Excel, KPI Reporting, Dashboard Development, Data Visualization
- **Data & Programming:** SQL, Python, Pandas, NumPy, R, Stata, Scikit-learn, Matplotlib
- **Data Platforms & Engineering:** IBM i, ODBC, Microsoft Fabric, Microsoft Azure, Relational Databases, Data Modeling, ETL/Data Transformation
- **Analytics:** Exploratory Data Analysis, Statistical Analysis, Predictive Modeling, Machine Learning, Time Series Analysis, Data Validation, Customer Analytics, Operations Analytics.

PROFESSIONAL EXPERIENCE

Caramagno Foods Co. | Detroit, MI
Data Analyst | Jan 2026 - Oct 2026

- Design and maintain Power BI analytics solutions across sales, customers, products, invoices, profitability, workforce productivity, and operational KPIs for leadership reporting.
- Query, transform, and model IBM i enterprise data using SQL, ODBC, Power Query, DAX, and relational data models.
- Develop DAX measures and dimensional models supporting MTD, YTD, YoY, rolling-period performance, customer activity, profitability, and invoice analysis.
- Partner with operations, IT, and leadership to resolve data-quality issues and deliver analytics across customer retention, AR, inventory, logistics, profitability, and workforce efficiency.

Data Analyst Intern | May 2025 - Dec 2025

- Created 10+ dashboards and visual reports and 20+ Microsoft Forms to improve CRM tracking, data collection, operational visibility, and stakeholder reporting.
- Analyzed routing, customer, sales, and operational data while collaborating with IT on dashboard requirements, automation, and data validation.

Universal Stream Solution, Inc. | Remote
Jr. Business Analyst | Mar 2023 - Dec 2023

- Conducted statistical and exploratory analysis of product, sales, and customer data using Python, Power BI, and Excel.
- Developed KPI reporting and automated recurring analytical workflows, improving sales reporting accuracy and consistency by 18%.
- Translated quantitative findings into stakeholder recommendations supporting product, sales, and business strategy.

PROFESSIONAL EXPERIENCE (CONTINUED)

First Advantage Pvt. Ltd. | Mumbai, India
Operations Analyst | Jul 2021 - Jan 2022

- Supported Infosys operations through data validation, quality reporting, compliance review, and operational process analysis.
- Analyzed operational datasets and feedback reports to identify quality issues and recommend workflow improvements.

PUBLICATION & RESEARCH

The Economic Impact of Tariffs on U.S. Businesses: Prices, Trade, and Investment
First Author | Journal of Applied Business and Economics, Vol. 28, No. 4 | 2026

- Applied ARDL, ECM, VAR, IRF, stationarity testing, and time-series modeling to analyze tariff effects on prices, trade, uncertainty, and private investment using BEA, BLS, and FRED data. DOI: https://doi.org/10.33423/r1ja5842

ANALYTICS PROJECTS

Sales & Customer Intelligence | Business Intelligence

Built an end-to-end business intelligence solution using SQL Server, Power Query, DAX, and Power BI with Microsoft AdventureWorks sample data.

Designed a star schema with one sales fact table and five dimensions, 55 DAX measures, and four interactive report pages covering sales, estimated profitability, customer activity, product performance, and territories.

GitHub: https://github.com/camelliapramanik/sales-customer-intelligence

Predictive Customer Churn Modeling | Machine Learning

Built and evaluated predictive models using preprocessing, feature analysis, and model comparison to identify churn-risk patterns.

Food Redistribution Database Design | SQL

Designed a normalized relational database using ER modeling and SQL queries to improve tracking and reporting.

EDUCATION

University of Detroit Mercy | Detroit, MI
M.S. in Applied Data Analytics | 2025

Deen Dayal Upadhyaya Gorakhpur University | India
B.Com. in Economics, Minor in Business Administration | 2018
